ADACTA

Digitalize your brokerage for speed and agility

While the changing role of brokers from mediator to strategic risk adviser provides opportunities, many brokers struggle to seize them due to a lack of proper IT support. Modern technology, such as AdInsure, allows brokers to fully leverage these new opportunities by digitalizing processes and providing the capability to design custom coverages.

FEATURES FOR BUSINESS TEAMS —

Support for all your teams, from sales to back office

AdInsure supports industrial and commercial brokers to digitalize their entire back- and front-office operations to streamline business processes across different lines of business and regions.

Opportunity and placement management

Manage opportunities and fast-track your tendering process to reduce the time needed to select the best offer.

Contract management

Provide insurance quotations, conclude contracts, and manage contract changes.

Custom broker products

Design and manage custom broker products and processes, from PAS to Claims.

Claims handling

Manage the complete Claims process, dependent on the insurance contract or participating insurers.

Commission management

Support for various models of brokerage calculation and payments assures flexibility and operations across different regions.
Billing and collection

Automated processes for sending of invoices, and other documents related to payment obligations.

Technical accounting

Features analytical data in subledger and integration with external general ledger.

AdInsure covers all your operation team needs

It is an advanced insurance platform that provides industrial brokers with all the features they need to meet existing and future customer demands and introduce a more agile approach toward carriers.

AdInsure offers the tools and capabilities your operation team needs to be self-sufficient and manage change easily.

Low-code approach to change management

User-friendly and fast configuration and deployment of insurance products.

Modern integration framework

Easy integration with existing and future systems and technologies via APIs or service buses.

Cloud-based

Flexible deployment options to accommodate your IT infrastructure and operating models, including hybrid and pure cloud deployment.

Layered architecture

Enjoy the benefits of regular core layer updates and flexibility of the customization layer.

BENEFITS —

Cloud-ready, future-oriented, open, digital platform for industrial insurance brokers

Fully digitalized and standardized operations

Provides the capabilities for digitalizing and streamlining all broker processes across different departments and business units.

Future-proof technology

AdInsure's modular architecture, cloud support, and integration capabilities offer flexible operational options.

Improved UX and collaboration

Modern UI, dashboards, and collaboration capabilities improve the experience of your teams and collaboration with insurers and clients.

Bundling of coverages across markets

Provides the capability to bundle various coverages and create insurance products for a wider public.

Faster time to market

Rapidly design, test, and deploy new types of coverages to deliver new offerings to market faster.
